GUEST SPEAKER
Adriane dela Cruz is the associate program director for the general psychiatry residency, and practices outpatient addiction psychiatry at the University of Texas Southwestern.

Dela Cruz completed her M.D. and Ph.D. in neuroscience at the University of Texas Medical Branch in Galveston, Texas, and her residency in general psychiatry and fellowship in addiction psychiatry at the University of Texas Southwestern Medical Center in Dallas.

She was the lead team study physician on the NIDA CTN-funded ADAPT-2 trial that assessed the efficacy of the combination of bupropion and extended-release naltrexone for the treatment of methamphetamine use disorder.

DESCRIPTION
This course is designed for medical professionals, faculty, students and individuals interested in learning about:

• The limited evidence base for pharmacological treatment of methamphetamine use disorder

• Two medications with evidence for efficacy in the treatment of methamphetamine use disorder

• The unique properties of the ADAPT-2 trial that allowed this study to be a definitive test of the efficacy of naltrexone and bupropion for the treatment of methamphetamine use disorder
