

Landscape of Clinical Trials During Covid-19 Pandemic Friday, November 12, 2021

Program Agenda:

12:00-12:30 pm sign in and lunch

12:30 pm-1:30 pm Educational Activity

*****Masks are required*****

To register, please RSVP to acrptulsachapter@gmail.com by 5:00 pm 11/10/2021

Course Description:

The research community's response to the COVID-19 pandemic has prominently highlighted many fundamental issues that exist in clinical trial research under the current system and its incentive structures.

The COVID-19 pandemic has not only re-emphasized the importance of well designed randomized clinical trials but also highlighted the need for large-scale clinical trials structured according to a master protocol in a coordinated and collaborative manner.

Learning Objectives

Upon completion of this session, participants should be able to:

- 1) List the changes that happened to clinical trials in 2020
- 2) Describe the technologies that are getting adopted by clinical trials due to pandemic
- 3) Summarize the FDA guidelines for clinical trials during the pandemic

Target Audience: All clinical research professionals.
